Labels can be printed using the printer on the 086 Bag Closing Machine.

Labels to be printed with the 086 Printer must be printed on uncoated label stock (or the uncoated side of our standard C1S Tagboard). Uncoated paper will permit the ink to be absorbed into the paper and prevent ink smearing.

Printers are available with block printers or band printers.

Two Printer Types are available:
Kwik Lok Type, Supplies sold by Kwik Lok Corporation.

Contact Type, Supplies sold by Contact and are generally available outside North America.

Note: The basic 086 machine is manufactured with different specifications to accept either a Kwik Lok type printer or a Contact type printer. Orders must specify the type of printer to be used.
