

1003 SEMI AUTOMATIC BAG CLOSING MACHINE

[Print Friendly](#)

Three models are available: The Model A, Model P and Model BP. The Model A uses the Series "RJ" Closures; Models P and BP use Series "RLS" Closures. These closures have a small paper label affixed to the closure to enhance the print quality.

The Model P features a Trodat® printer which uses "grooved, press-on" rubber type. Press-on type permits customizing of imprint copy. The Model BP features a Trodat Band Printer for printing dates.

These machines are so simple to operate that even inexperienced operators can close up to 30 bags per minute. Insert the bag neck into the machine to apply the Kwik Lok® Closure. Removing the bag automatically positions the next closure for another package.

Maintenance free, the machines feature a unique, simple design that has eliminated the use of motors, gears and other maintenance-demanding components. The 1003 machines are portable, or can be permanently mounted. Suction-cup feet allow the portable unit to be used on any flat, clean surface. Bolt holes are pre-drilled for permanent mounting (bolts are not included). A kit is also available for mounting the machines on an Oliver Slicer.

TYPICAL APPLICATIONS

Bakery products, candy, snack foods, puffed wheat, potato salad, meat patties, auto and bicycle parts, filters, flower bulbs, popsicles.

CLOSURES USED BY THE 1003 MACHINE

SERIES RLS (MEDIUM DUTY)

SERIES RJ (MEDIUM DUTY)

SPECIFICATIONS

HEIGHT: 12.5 " (31.8 cm)

WIDTH: 6.75" (17 cm)

APPROXIMATE SHIPPING WEIGHT & DIMENSIONS

14" x 8" x 21"; 15 Lbs; 1.4 Cu Ft.

TYPE	MODEL	CLOSURE	SPEED	PRINTER
1003	A	RJ	30 BAGS/MIN	NO
1003	AP	RLS	30 BAGS/MIN	BLOCK
1003	ABP	RLS	30 BAGS/MIN	BAND

For hand marking Series "RJ" closures, order ScotchCode® SMP Marking Pen (Part No. P18-00028).

MOUNTING OPTION: If the 1003 is to be mounted on an Oliver Slicer, order Kit No. Z0003001.

PRINTING ON THE KWIK LOK CLOSURE WITH THE 1003

Two printing systems are available for the 1003 machine, both are manufactured by Trodat®.

BAND PRINTER: Capable of printing many common packaging date codes.

BLOCK PRINTER: Uses individual rubber type alpha-numeric characters, allowing the packager to customize their package price/coding.
