	M. Returned Materials Authorization

GENERAL SAFETY INFORMATION

Be sure the following safety instructions are read, understood and become a part of daily practice when operating or maintaining the closer.

- 1. Do not attempt to operate the closer until you understand its function. Study the manual carefully.**
- 2. Electricity is potentially dangerous. Do not remove the machine covers. There are exposed electrical components within that can cause serious electrical shock. All maintenance and adjustments must be performed by competent personnel.**
- 3. Always tighten the knob to secure the closer to the stand. If the closer is allowed to rotate on the stand, it may come out of balance and tip over.**
- 4. Keep any foreign material and fingers away from moving parts.**
