

898

Closure Printer-Separator

The Kwik Lok® 898 Closure Printer-Separator gives packers a simple solution to meet package closure traceability and dating requirements on hand-applied packing lines. The 898 allows you to print a wide variety of information on closures and on the closure portion of closure-labels. It automatically separates individual closures from a reel.

MODELS

898 B has a fully air-operated cold transfer printer ideally suited for printing multi-line information on Kwik Lok bag closures. Type can consist of prices, dates, codes, logos, and lot numbers. The 898B is electrically operated.

SPECIFICATIONS: Height 38" Width 13" Length 22"

898 E utilizes the VIAjet™ L12 Series built by Matthews Marking Systems.™ It is a programmable industrial ink jet system. The 898E applies printed copy on Kwik Lok bag closures. It does not require compressed air and is all electrical.

SPECIFICATIONS: Height 41" Width 15" Length 30"
