

WHO WE ARE

Kwik Lok Corporation is a family-owned business that has been providing easy and sustainable ways to keep foods of all kind fresh since 1954. Today we're a multinational company with six factories that serves 80 countries on six continents. We currently offer bag closures, bag closing equipment, labels and printing solutions for just about all bagged packages.

A FRESH APPROACH TO SUSTAINABILITY

At Kwik Lok, we've always been dedicated to creating the best bag closing and printing solutions for food industries around the world. We also recognize that as a plastics company with a global footprint, we have a responsibility to minimize our impact and an opportunity to drive meaningful change.

This new Fresh Start initiative is our commitment doing just that. It's our promise to continue to improve, innovate and lead by example. At the core of our Fresh Start initiative, we have instituted a sustainability planning, governance and reporting system to hold ourselves accountable to the highest standards. This system is rooted in the following four key strategies.

STRATEGY 1: UNLOCKING OPPORTUNITY THROUGH EDUCATION AND ECONOMIC SUCCESS.

Whether offering cross-training to employees or providing scholarships to students in our community, Kwik Lok is dedicated to helping people achieve their potential. We continue to strengthen our on-the-job training programs.

STRATEGY 2: IMPROVING THE HEALTH, SAFETY AND WELL-BEING OF ALL PEOPLE

At Kwik-Lok we know that health and safety go beyond keeping employees safe at work. That's why we promote an inclusive environment, provide access to affordable and comprehensive health insurance and sponsor a wellness program.

STRATEGY 3: PROTECTING PEOPLE, PLACES AND THE PLANET

While at our core we provide an easy way to keep food fresh and safe, we also strive to minimize our waste and reduce our impact on the environment. Our goal is to reach zero waste.

STRATEGY 4: FOSTERING INNOVATION IN FOOD SAFETY, ACCESS AND MANUFACTURING

Kwik Lok has always led the way in low-cost, time-saving food safety technology. As we look forward, we seek to continue to innovate with an eye towards environmentally sound production, reuse and recycling, including the development of compostable closures.
