

ENVIRONMENTAL POLICY

Kwik Lok Corporation manufactures closures that are designed to be reusable.

Kwik Lok is committed to minimizing the impact of its activities on the environment, both locally and globally.

Through the recycling of production scrap in our manufacturing process, we are able to minimize production waste to near 0%.

We define, monitor and review environmental objectives and ensure compliance with all applicable legal, regulatory, and other requirements concerning our activities, products, and services.

This policy will be communicated to all employees and made available to the public upon request.
