

INTRODUCING FIBRE-LOK 100% PAPERBOARD. 0% PLASTIC.

Fibre-Lok is a bag closure made from 100% natural cellulose fibers. With zero plastic used in manufacturing, it is provisionally recyclable and answers the customers need for a durable and recyclable product. Fibre-Lok is backed by Kwik Lok's 65-year history of reliability and is the clear choice in helping your company achieve its sustainability goals.

ALIGNS WITH AUSTRALIAN SUSTAINABILITY STANDARDS

ZERO PLASTIC

Fibre-Lok is composed of 100% natural cellulose fibers of wood.

ZERO CHEMICALS

Fibre-Lok is made from a standard paper grade that is often used in food packaging. There are no petroleum chemical components or derivatives.

100% RESPONSIBLE

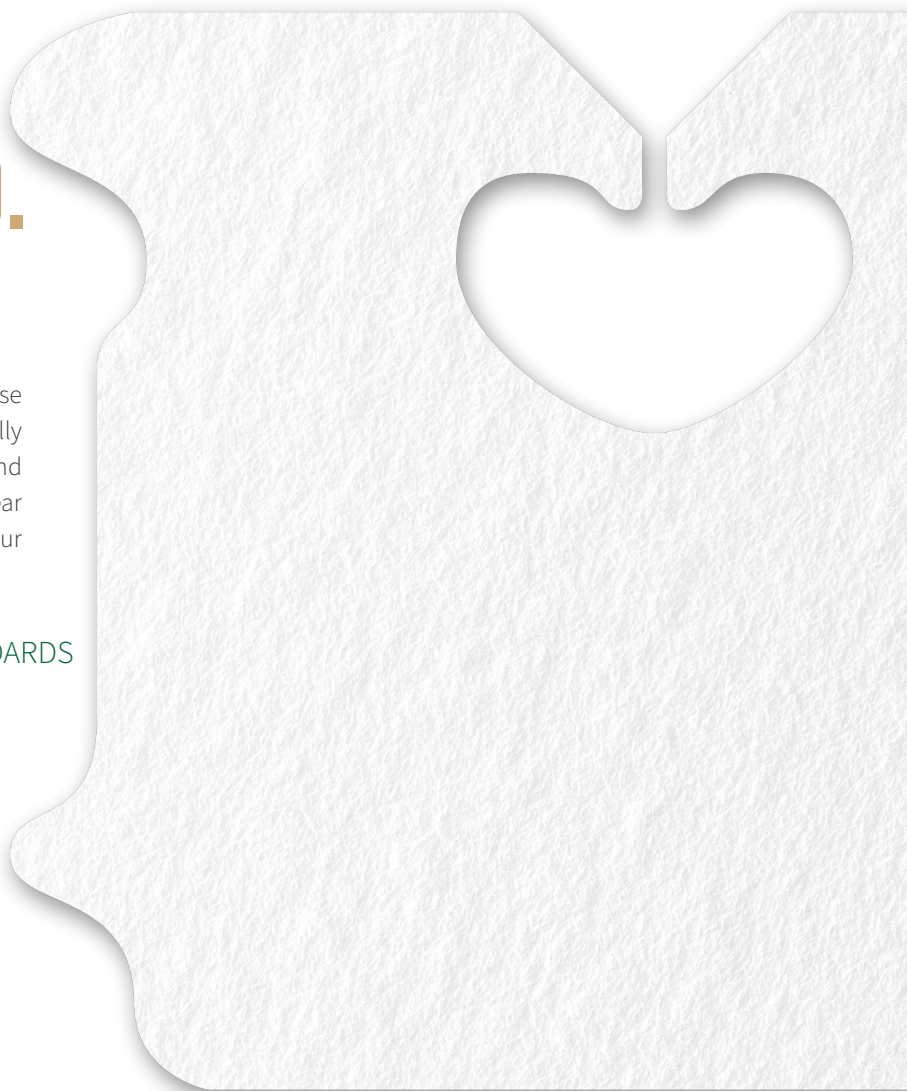

The wood pulp used in Fibre-Lok comes only from FSC (Forest Stewardship Council) certified suppliers and renewable sources.

EXCEEDS REGULATIONS

Fibre-Lok meets or exceeds all known environmental and health regulations.

READY FOR CLOSING

Fibre-Lok can be used with any Kwik Lok automatic bag closing machine with slight modifications.

Fibre Lok was recognized as a top 3 finalist out of 500 entrants for the Fine Food Australia Best New Product Award, 2022.
