

INTRODUCING **FIBRE-LOK** THE ONLY BAG CLOSURE THAT'S HOME COMPOSTABLE

Fibre-Lok is a bag closure made from 100% natural cellulose fibers. This means there is zero plastic used in manufacturing, answering customer demands for a bag closure that is durable and that they can compost from the convenience of their home. It's backed by Kwik Lok's 65-year history of reliability and is the clear choice in helping your company achieve its sustainability goals.

ALIGNS WITH EUROPEAN SUSTAINABILITY STANDARDS

ZERO PLASTIC

Fibre-Lok is composed of 100% natural cellulose fibers of wood and cotton.

ZERO CHEMICALS

Fibre-Lok is made from a standard paper grade that is often used in food packaging. There are no petroleum chemical components or derivatives.

100% RESPONSIBLE

The wood pulp used in Fibre-Lok only comes only from renewable sources.

EXCEEDS REGULATIONS

Fibre-Lok meets or exceeds all known environmental and health regulations.

READY FOR CLOSING

Fibre-Lok can be used with any Kwik Lok automatic bag closing machine with slight modification.
