

NEW! EXCITING! LESS!

Looks like we just arrived at a new standard in bag closures.

34%
LESS PLASTIC

Introducing Enviro-Lok, a brand new polypropylene bag closure that is made to keep products safe and fresh, while also delivering a better potential for recycling. Of course, you still get the same strength and reliability that goes hand in hand with the Kwik Lok name, just with a smaller footprint (of the carbon variety of course). And that's good for profit as well as the planet.

67%
LESS WATER

LESS PLASTIC

Enviro-Lok is made with 34% less plastic than your standard Kwik Lok closure.

LESS WATER

Enviro-Lok uses about 67% less water compared to standard Kwik Lok closure.

44%
LESS CARBON
EMISSIONS

LESS CARBON

There's 44% less carbon emissions going out in the world.

NEW LABELS

New ultrasonic welded labels are made from the same materials as Enviro-Lok, removing the need for adhesives and making Enviro-Lok even more prepared for recycling.
