

INTRODUCING **FIBRE-LOK** 100% PAPERBOARD. 0% PLASTIC.

Fibre-Lok is a bag closure made from 100% natural cellulose fibers. This means there is zero plastic used in manufacturing. And, it answers the customer demands for a durable and recyclable product. Fibre-Lok is backed by Kwik Lok's 65-year history of reliability and is the clear choice in helping your company achieve its sustainability goals.

ZERO PLASTIC

Fibre-Lok is composed of 100% natural cellulose fibers of wood.

ZERO CHEMICALS

Fibre-Lok is made from a standard paper grade that is often used in food packaging. There are no petroleum chemical components or derivatives.

100% RESPONSIBLE

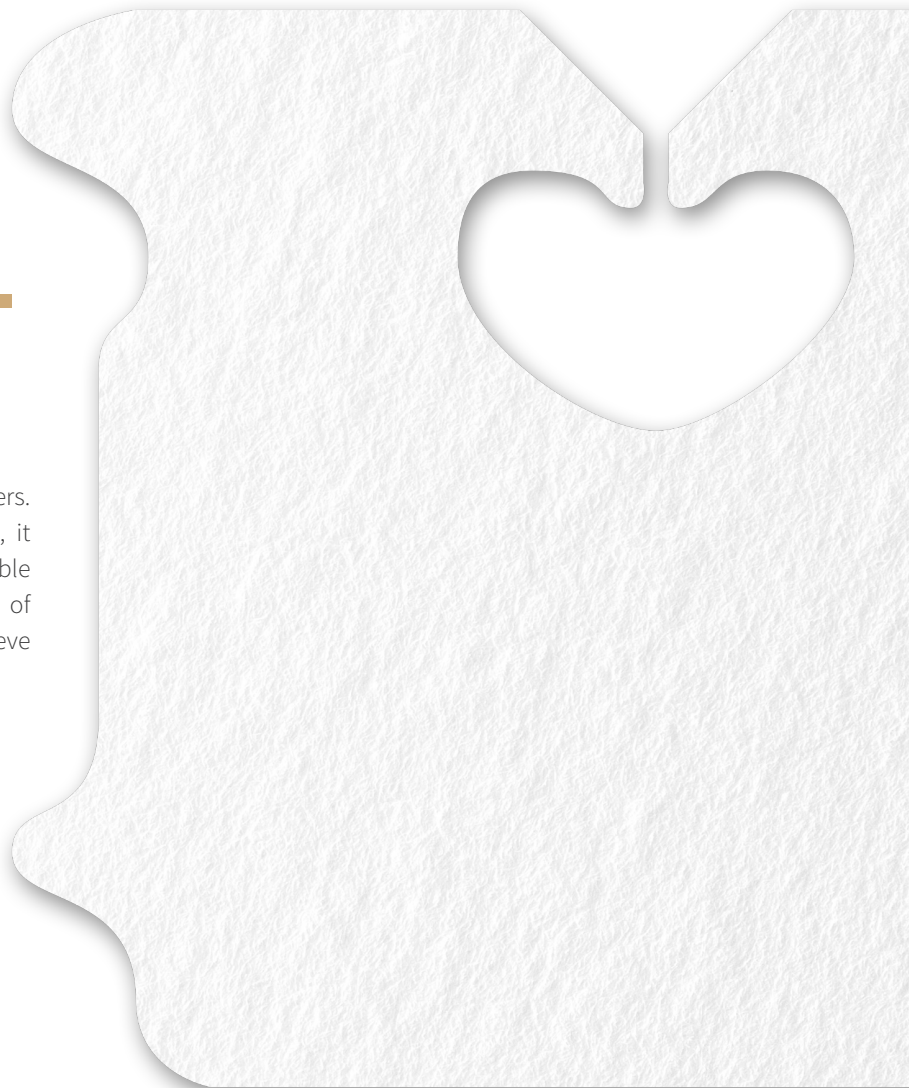

The wood pulp used in Fibre-Lok comes only from renewable sources. This product is made of material from well-managed, FSC®-certified forests and other controlled sources.

EXCEEDS REGULATIONS

Fibre-Lok meets or exceeds all known environmental and health regulations.

READY FOR CLOSING

Fibre-Lok can be used with any Kwik Lok automatic bag closing machine with slight modification.
