RE: FDA Registration – Non-Applicable.

Kwik Lok production facilities and its products is not, nor is it required to be regulated by the FDA.

Kwik Lok Corporation manufactures bag closing equipment and bag closures (Loks). The bag closures are a non-hazardous material made from either a plastic-based material or a paper/fiber material depending on the product line. These are non-food items and non-direct food contact packaging articles; they are secondary packaging components overall.

Kwik Lok manufacturing locations do not engage in producing, processing, packing, or storing food or food ingredients for supply chain distribution.

A manufacturer making food packaging articles is not required to register with the FDA, and there is no “optional” registration for such facilities according to: 21 CFR Part 1 Subpart H.
